

PRODUCT BENEFITS

Both products offer the same important flexion characteristics to extend your playing time and comfort by eliminating much of the jarring impact inherent in hard surface courts. Play longer with more comfort! Other Benefits include

- » 3/4" thick Tiles with highest level of shock-absorption and Flexion rating in the industry
- » *Surface Expansion Technology* for All-Weather athletic performance
- » Ultimate level of sports performance for [basketball](#), [deck & inline hockey](#), [tennis](#), volleyball and more
- » Superior coefficient of friction for undisputed BEST surface TraXion - *Tested*
- » High durability, impact stability and rolling load rating
- » Fast drainage and Low Heat Radiation
- » No adhesives or anchors required
- » Long term surface appeal. Covers cracks, puddles and stains
- » Custom logos and graphics
- » U.V. protection for outdoor color performance
- » 16 standard colors with Custom options

HIGH FLEX SUSPENSION SYSTEM

The understructure of the Flex Court® sports tiles generates superior shock absorption and added safety during play. The tile support structure is designed based on a proven suspension technology producing the highest Flexion rating in the industry.

SURFACE EXPANSION TECHNOLOGY

The Flex Court® sports tiles patented locking system incorporates a Surface Expansion Technology that produces the undisputed **BEST** surface performance in every climate condition.
